Rapid Test Device

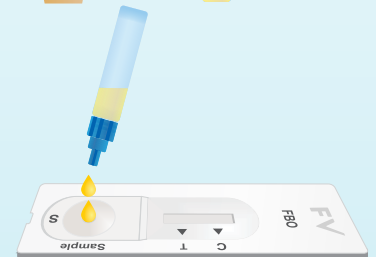

Rapid test for FOB (Fecal Specimen)

**For Qualitative
Detection of FOB
(Fecal Occult Blood)
of stool sample in
human fecal specimen
Rapid Test**

- **Rapid Detection:** Quick and accurate detection of Human Occult Blood in feces
- **High Sensitivity:** Detects low levels of Fecal Occult Blood (50ng/ml or 6ug/g feces)
- **No Diet Restrictions:** Unlike traditional guaiac-based methods, accuracy not affected by patient diet
- **Early Detection:** Helps identify gastrointestinal problems such as colon cancer, ulcers, and polyps in early stages
- **Easy to Use:** Simple, qualitative test with clear results
